

Deepak Mandali

Prompt Engineer | Web Full-Stack Engineer

Phone: +91 7569777677 Email: mandalideepak146@gmail.com

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building end-to-end machine learning and full-stack systems. Strong foundation in data preprocessing, model training, REST APIs, and deployment workflows. Experienced in converting real-world problems into deployable AI-driven applications. Passionate about **marketing strategy** and **problem-solving**, with a keen interest in applying analytical thinking to user acquisition, product positioning, and growth challenges. Comfortable working in fast-paced startup environments and taking ownership of features from design to implementation.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript
- **Web Dev:** React.js, Node.js, Express.js, MongoDB
- **ML:** Supervised Learning, LSTM, NLP, Model Evaluation
- **Tools:** Git, GitHub, VS Code, Postman
- **Cloud:** Microsoft Azure (AI Fundamentals)

CERTIFICATIONS

- Microsoft — Azure AI Fundamentals (2024)
- AWS Educate — Cloud Storage (2025)
- Cisco — Data Analytics (2025)
- IBM — Data Fundamentals (2024)

INTERESTS

Marketing & Growth Strategy — Enthusiastic about digital marketing, brand storytelling, go-to-market strategy, and data-driven growth hacking. Keen to apply technical skills in building marketing automation tools and analytics dashboards. **Problem Solving** — Enjoy tackling complex, ambiguous challenges through structured decomposition, rapid prototyping, and iterative refinement — whether in code, system design, or business strategy.

EXPERIENCE

Google Hackathon — Participant

Google

2024

- Developed an AI-powered solution under time constraints, leveraging Google Cloud APIs and Gemini/Vertex AI tools.
- Collaborated in a cross-functional team to design, prototype, and pitch a market-ready product within 24 hours.
- Applied prompt engineering and full-stack integration to build a functional demo showcasing real-world impact.

Intern — Networking & IT Systems

Arka Hospital

2024

- Assisted in system configuration, network troubleshooting, and infrastructure monitoring.
- Supported deployment and maintenance of internal hospital systems.
- Implemented basic security protocols and system performance checks.

HACKATHONS

- **Google Hackathon** — Participant (2024) — Built an AI-driven solution using Google Cloud & Gemini APIs
- **Smart India Hackathon** — Participant — National-level government innovation challenge
- **AQVH Hackathon** — **Finalist** — Reached the final round with an impactful tech solution
- **NUTRIVORA Food Ideathon** — Participant — Proposed a food-tech solution addressing nutrition challenges

PROJECTS

Stock Price Prediction System (*LSTM, Python*)

- Built a time-series forecasting pipeline using LSTM networks for financial trend prediction.
- Designed feature engineering, scaling, and evaluation metrics to improve prediction consistency.
- Developed a Gradio-based interface for interactive model testing.

Student Performance Prediction System (*ML Pipeline*)

- Implemented supervised ML models using structured academic datasets.
- Built a preprocessing pipeline with feature selection and evaluation metrics.
- Achieved improved classification accuracy using ensemble techniques.

Full-Stack E-Commerce Platform (*MERN Stack*)

- Developed a responsive frontend using React with REST API integration.
- Implemented backend services using Node.js and Express with MongoDB.
- Designed authentication, product management, and CRUD operations.

AI Voice-to-Code Assistant (*Python, NLP*)

- Built a speech-to-text pipeline using Python speech recognition.
- Converted voice commands into executable Python scripts using NLP parsing.
- Integrated modular architecture for scalability.

PowerSaver AI — Gamified Energy App (*AI, React, Node.js*)

- Built an AI-powered energy-saving platform for college and hostel students, monitoring power usage and providing intelligent reduction recommendations.
- Implemented a gamification engine where students earn coins for hitting energy-saving milestones and maintaining daily/weekly streaks, driving sustained behavioural change.
- Built a leaderboard and reward dashboard with React.js, encouraging healthy competition among hostel floors and departments.
- Designed backend APIs with Node.js and MongoDB to track coin balances, streak history, and device usage logs.

Student Trip Budget Calculator (*React.js, Node.js, REST API*)

- Built a collaborative trip budgeting tool for students enabling group expense splitting, per-head cost estimation, and real-time budget tracking.
- Implemented trip categories (transport, food, stays, activities) with dynamic cost breakdowns and visual chart summaries.
- Designed a mobile-responsive UI with React.js for easy on-the-go access during trips.
- Integrated REST APIs for live currency conversion rates and local cost-of-living estimates for travel destinations.
- Added export functionality allowing students to download itemised trip budget reports as PDFs.

PROFESSIONAL SKILLS

- **Analytical Problem Solving** — Structured approach to debugging models, optimising performance, and resolving backend issues; applies the same mindset to marketing funnel analysis and campaign optimisation.
- **Marketing Mindset** — Interest in user behaviour, growth metrics, A/B testing, and translating technical products into compelling value propositions.
- **Communication** — Clear verbal and written communication for presenting ideas, explaining technical concepts, and collaborating effectively.
- **Ownership & Accountability** — Experience taking projects from ideation to deployment with minimal supervision.
- **Adaptability** — Quick learner of new frameworks and tools to meet evolving project requirements.
- **Team Collaboration** — Worked in hackathon teams and academic groups to coordinate frontend-backend integration and ML experimentation.

EDUCATION

B.Tech — Computer Science Engineering	<i>2022 – 2026</i>	FIITJEE Intermediate college	<i>2020 – 2022</i>
<i>Karunya Institute of Technology and Sciences</i>		<i>FIITJEE High School</i>	<i>2020</i>

HOBBIES & LANGUAGES

Hobbies: Watching business podcasts	Listening to music	Reading books	Languages: English (Fluent)	Telugu (Fluent)
Hindi (Basic)
